Labor

INTELLIGENT, ambitious, honest labor is the modern
 King Midas that brings wealth to our community, happi-
 ness to our existence, and progress to our civilization. The
 world is indebted to the laboring man and woman for all that is
 of value to civilized mankind. The farm worker, the miner, the
 street worker . . . even the most unskilled of laboring men that
 you might choose . . . holds an honored niche in the complex pat-
 tern of life. LABOR is the magic hand that brings value . . .
 and greater value . . . to everything it touches. This is the Day
 of Honor for the working man . . . the day dedicated to the toil-
 ers out of respect to the good they do for every last one of us.
