Thursday nig Brown, of the guest of Lynch, 407

On Labor Day Program.

Tony Ridola and Company, Europe's contribution to the American scene of amusements, will be presented in the grandstand bill of events during the big Labor Day celebration at Hornady Park at Petersburg. Tony Ridola, top man of the trio, is rated the world's outstanding comedy ladder balancing star. One of his stunts is a somersault made in a chair from the top rung of a ladder and landing in a sitting position, chair and performer. It was this daring and

phenomenal trick that landed Tony on top of his field. This trio is virtually a miniature United Nations: Tony is himself a Belgian, while his pretty and talented partners, Enrica Pichia-dine, hails from Mexico, and Marie Parmeggiane from Italy. Tony is not only an excellent performer but could as well qualify as a U.N. staff interpreter. He speaks and writes English, German, French, Italian, Flemish and Spanish. Since his early youth in show

business he has performed in Africa, India, Australia, South America, as well as every city in Europe. During the war years he played every theater in the neighboring republic. Ridola's breathtaking and daring stunts on the rocking ladder are many. During his first American appearance he was presented by Ringling Brothers circus as the center stage attraction. All of his difficult stunts are presented in a comical vein.
