storm period beginning on the 4th and extending to the 10th promises to bring many prolonged and severe perturbations. The disturbances at this time will almost certainly be aggravated in character, and prolonged with possibly very slight intermission, into and through the reactionary storm period central on the 11th and 12th are unusually great. Wednesday, the 7th to Saturday the 10th, will bring a decided crisis showing that equinoctial hurricanes of great extent and violence with thunder storms and possible tornadoes in many places.

The next regular storm period extends from the 16th to 21st. Whatever character of storms are in progress during the period, 16th to 21st, Sunday the 18th to Wednesday the 21st will bring the culminating crisis of the period.

A regular Vulcan storm period is central on the 20th, extending from the 27th, two or three days into October. As we enter this period the barometer will fall, the temperature will again rise to quite warm and the scattering storms will be advancing eastward over the country about the 29th to 30th.

NEURALGIA CONQUERED.

When doctors agree that a certain preparation is a speedy cure for a specific malady, all sufferers from that malady will be glad to listen to their statements. The following physicians are men of large practice. What they say is an accurate record of the results obtained in the treatment of neuralgia by Phenamid, the great pain destroyer.

J. Husson, M. D., of New York, writes: "I have been using Phenamid for some time (in severe neuralgia cases principally) with very good results."

W. C. Ledbetter, M. D., of Bloomfield, Texas: "Tried it with satisfactory results in neuralgia and headache of a climateric nature."

Phenamid Tablets are a positive cure for neuralgia and all forms of pain, including headache, rheumatism, dyspepsia, sciatica, etc. They do not affect the heart nor upset the stomach. Price 25c. For sale by J. H. Clark & Son, who with keen foresight obtained the agency from the manufacturers, Osborn-Colwell Co., New York. sepl-2-3

LABOR DAY WILL BE A NOTABLE ONE IN PRINCETON.

Fair Opens, Masonic Cornerstone Ceremonies, New Mayor in and Big Labor Celebration On.

Monday will be a notable day in Princeton. It will be the opening day of the Gibson County fair; the occasion of the Labor day celebration; the laying of the cornerstone of the new Masonic building now in course of construction will be one of its features, and lastly it is the date for the new mayor, city clerk, treasurer and marshal to take the oath of office.

It will be a big day and Princeton means to do itself proud in the many things of public interest. There will be lots of visitors here and most everybody will be kept busy extending the glad hand.

The Labor day celebration will probably be the event of most common interest. Hundreds of visitors will probably come to the city to attend the celebration. Vincennes alone expects to send a delegation 1,000 strong. They will come here on a special train Monday morning and are expected to arrive about 9 o'clock. Fifteen trade unions and two bands will be represented in the delegation. Evansville, Mt. Carmel, Oakland City, Fort Branch, Hazleton and other neighboring towns and cities will be represented by big crowds. Owensville will send a big crowd and probably a band.

One of the features of the day will be the parade to be given at 2 o'clock in the afternoon. The line of the parade is as follows: Form in west Emerson and Embree street, march east to Hart street, south on Hart to State, thence around the public square; then west on State street to Embree and the fair grounds. Two Princeton bands, two from Vincennes and the Owensville band will be in the parade.

An excellent program has been arranged for the afternoon at the fair grounds, several prominent speakers having been secured. At night a display of fire works will be given at the fair grounds. There will also be a dance and other enjoyable features.

The marshal of the day is William Van Stone and he will be assisted by Ralph Burton, John Butterworth and J. C. Roberts, and each delegation will have a marshal of its own to keep the delegates in line and to prevent disturbances.

The committees having charge of the Labor day demonstration have done their work well and have left nothing undone that would add to the pleasantness of the occasion.

When the fairness from the recent heavy rain leaves the ground it would be a fair time to cut the weeds.

The weeds should have been cut before this, you know, but perhaps you have been waiting on your neighbor to cut the weeds on his lot and have neglected your own.

In a number of places, even along the principal streets, the weeds have grown out over the brick walks, so that it is almost impossible to get through them without getting wet to the waist after a rain or a heavy dew.

In north Prince street the limit has evidently been reached. Just south of the colored Masonic hall, in the vacant lot, the weeds, briars and shrubbery have attained a growth of the very rankest kind. A man with a wagon and team could drive in the lot almost anywhere and would be concealed from view. Probably there are no wild animals within its borders, but this is not saying it wouldn't be a No. 1 place

for them. The owner would be notified by telephoning the condition of things—it would be advisable to go personally.

And there are other cities almost as bad as this street wilderness.

Peep out through the shrubbery and curse their negligence.

Some women have dish water is a de- creeping vines and to they are using this

An Interesting Author Hunt In the Wilds of Hoosier

PIERIAN SPRINGS, Ind., Sept. 3.—A number of publishers are here for a few weeks' author-hunting, and it is the general opinion among them that the shooting season is uncommonly poor. Big game is very scarce; and even such crack shots as Col. Harvey, Col. Bobbs and Col. McClure have brought but few notables out of the woods. A few years ago, as Col. Bobbs remarked reminiscently, one could go out almost any day and bag a Best Seller.

There is no lack of small game, especially poets, who are as plentiful as chipmunks. But hunting them is about as thrilling sport as a jackrabbit drive in California, as Col. Harvey observed, over a cigar, on the veranda of the Pierian Springs house. And they seem to know they are in no danger of the bag, for they roam about freely as the lowing herds. Whistle to one and he will gambol up to you with his manuscript in his mouth and it is next to impossible to shoot him away.

All the author hunters I talked with are agreed upon the need of a close season on authors, with stringent laws against snaring, netting and hunting with dogs. Col. Bobbs offers an amendment that a reasonably heavy license fee be exacted of hunters from outside the state.

This morning the beaters reported that they had started up an author

head, which immed enormous proportions.

"Every time I find money," remarked the no true sportsman of ammunition."

"Gentlemen," said "the drinks are on me to the hotel."
