ONE-THIRD MORE MANY LEAVE TOWN HICKS PREDIC

FAIR ENTRIES FAR EXCEED THOSE OF LAST YEAR.

Every indication of a Banner Week Preparations at Grounds—Program for Tuesday.

Entries are still pouring into the big Gibson county fair and at present give evidence of surpassing those of any fair in the history of the association by at least one-third. That this is to be the banner fair in county history begins to be more and more evident.

The secretary, John R. McGinnis and his assistants, and the officers and directors generally are working over time to stem the tide of entries and exhibits pouring in. Tomorrow the crowds will begin to appear in their old time exuberence. The rainfall of Sunday evening comes in the nick of time, and will be worth-money to the association, laying the dust nicely. The officers express themselves as satisfied with the weather outlook. A few night showers will not hurt anything, and will in fact be good.

Sunday Attendance.

Yesterday was an occasion for the early sight seers to get busy, and they were on the grounds at an early hour. In the afternoon, people in their Sunday best thronged the scene wandering about in anticipation of the coming events of the week, many of them, no doubt, considering it the first day of the fair, inasmuch as they succeeded in getting good and tired wandering over the grounds. It is estimated that fully 2,500 people

LARGE LABOR DELEGATION GOES TO SULLIVAN, IND.

A Number of Persons go to Evansville Where There is Also a Celebration on a big Scale.

At 7:30 o'clock this morning a big delegation headed by the Ft. Branch band left for Sullivan, Ind., to take part in the Labor Day exercises at that place. Over 200 left from this place, and some 600 or 700 were expected to swell the crowd at Vincennes. The preparations at Sullivan are on a big scale and practically the entire town will turn out to do honor to the occasion.

Many persons went to Evansville where Labor Day is also being celebrated. The program at this place includes a monster procession and speeches appropriate to the occasion. It is probable that next year Princeton will get the date, and Labor Day will be celebrated in our city in a way that will make the occasion long remembered.

EVENTFUL OUTING

OWENSVILLE CAMPERS AT LONG POND ARRESTED.

Accused of Milking a Cow—Charge Falls Down—Indignation at what is Termed Spitework.

FAMOUS LONG RANGE WEATHER PROPHECY AT BAT.

Sees Storm Centers, Low and High Barometers, Lines of Demarcation, Etc. in September.

Rev. Ira Hicks casts his prophetic optics upon the oyster month and sees many things that are hidden from the average man. Rev. Hicks has seen it and he has missed it. Thousands of people over the country have followed his far seeing vision, and relied upon it to plan their lives accordingly. The prediction for the month follows: you may take your choice. Rev. Hicks hasn't missed it much on the jump:

A regular storm period is predicted on September 1st, extending to the 4th. The month promises to come in with areas of high temperature, low barometer and storm reactionary storm period is predicted on the 7th and 8th and this fact probably, will cause storms to originate on the 6th to continue through the 7th and 8th. If higher barometer follows close behind any of the September storm areas frost is almost a certainty.

A regular storm period is predicted on the 12th and covers the 13th to the 15th. Look for high temperature, low barometer, threatening clouds and severe electrical phenomena, centering progressively from the 11th to 14th.

A reactionary storm period is predicted on the 17th, 18th and 19th. This period will carry the earth to the winter of its autumnal equinox. It will also inaugurate a series of storms.
