KIDNAPER-SLAYER BEGINNERS ARE AT LARGE IN BETTER SHAPE THAN LAST YEAR

TOTALING \$3,100 OFFERED FOR APPREHENSION OF BEND FIEND

Ind., Aug. 30.—(AP)—Kidnaper and slayer of 8-year-old girl remained at large today continued to follow trail of \$3,100 have been offered for apprehension of man who enticed the girl into a car Wednesday evening, to take her to a prison for almost a year and finally to have her killed. Her body, the slayer, was found Thursday night at the home of her mother. Efforts today to establish a link between the kidnaping and an attack yesterday on Joseph Wisniewski, who fought them off and recovered clothing from one of the persons were unsuccessful, but were later revealed also quizzed all owners of the type of car used by a man who attempted to kidnap Maryvonne to ride with her, satisfied nothing to do with the case. Sheriffs investigated a man in an adjoining town, girl's screams were heard from a cottage

INSPECTION OF CHILDREN OF THREE SCHOOLS COMPLETED—PAROCHIAL AND LINCOLN LATER

The beginning school children for the three districts have been inspected by the school nurse, Miss Leona Adam, assisted by the teachers and parents. Due to a rather poor response at the clinic held this week it is thought best to hold, hereafter, no more clinics during fair week. The parochial and Lincoln school children will be inspected after the opening of school. As a whole, the children are in better condition than last year's beginners. The defects are less pronounced than last year. Some have had tonsils removed and more than last year have had dental work done. However, this still seems to remain the greatest problem. Parents should realize the necessity for caring for the baby teeth. Proper care of these teeth has a great deal to do with the formation and perfection of the second set. Many children of six years are getting their permanent molars or buck jaw teeth. There were 59 children inspected. Of these there were 11 with defective vision; 40 with defective teeth; 16 with apparently abnormal throats, and 18 were ten per cent underweight. The apparent vision defect of the 11 children is very slight yet it should be checked frequently to determine if the condition has changed. Of the 59 present, there were only 30 who drank a sufficient amount of milk. Fifteen drank tea or coffee. Only 28 made daily use of a toothbrush. It is impossible for the school work

GAS COLLECTIONS IN BIG INCREASE

INDIANAPOLIS, Aug. 30.—(AP)—Gasoline tax collections in Indiana during August amounted to \$1,866,390.58, the highest on record. The amount collected was an increase of \$202,144 over the collections in August of last year and an increase of \$13,481.75 over the previous high month, September of last year.

CRASH BOOSTS TOLL AT RACES

CURTISS-REYNOLDS AIRPORT, CHICAGO, Aug. 30.—(AP)—The death toll had increased to three as the national air races zoomed into their eighth day. The third person to be killed in a week of racing and stunting was George Fernie, aircraft designer of St. George, Staten Island, N. Y., who plunged to his death late yesterday in a plane he built himself. The ship, of radical design, featuring a short auxiliary wing fell far from the 40,000 spectators but in the midst of closely parked airplanes. Pilots and mechanics dashed to safety but Fernie's plane smashed a ship which had just been flown in one of the races.
